-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The finality of the previous Office action is hereby withdrawn for the purpose of applying a new ground of rejection.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tanzer et al.

Tanzer et al. show a method of assembling a cooling assembly locating a power module on a cold plate capable of receiving liquid coolant flow therethrough. The illustrative embodiment employs two pairs of machine screws 56, 58 (see Fig. 1, one screw located at each corner) to attach the module at an opening and seal it via seal 54. An alternative to screws disclosed is the use of spring clamps 60, 62 (see Fig. 2, note lines 47-52 of column 3). Thus, Tanzer et al. appear to explicitly teach the use of pairs of spring clips to hold the power module in place and compress the gasket 54.

Even assuming *arguendo* that Tanzer et al. do not explicitly disclose the use of at least two pairs of clips (cross sectional view in Fig. 2 illustrates only one pair), the showing of two pairs of screws and the suggestion of spring clips as "alternate means for securing the power module" would suggest a comparable number of clips to hold the module in place.

Claims 1-9 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (703) 308-1015. The examiner can normally be reached on M-F 9:00-5:30.
